

EL-SAYED MOHAMED ABDO

Senior iOS Engineer · Swift | SwiftUI | UIKit | Clean Architecture | MVVM & VIPER · 7+ Years
sayed.m.abdo123@gmail.com | [+966 569 474 003](tel:+966569474003) | Riyadh, Saudi Arabia | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior iOS Engineer with 7+ years delivering secure, high-scale applications across government, energy, e-commerce, and education. Architected and shipped 10+ production apps in Swift, SwiftUI, and UIKit — including a national utility app serving 11M+ users and a government suite serving 500K+ citizens. Cut production crash rate by 95% on a flagship enterprise app, and today set iOS architecture and code-quality standards for a team of 5+ engineers under Saudi government security requirements.

PROFESSIONAL EXPERIENCE

Senior iOS Engineer

Oct 2024 – Present

2P Perfect Presentation | Riyadh, Saudi Arabia

- **Own end-to-end architecture and technical direction** across a portfolio of government iOS applications, applying Clean Architecture and MVVM to support secure, scalable, and maintainable delivery.
- **Set technical standards for a team of 5+ engineers** through structured code reviews, shared architectural guidelines, and hands-on mentoring — improving release consistency and reducing regression rework.
- **Led the refactor of legacy modules** into modular, testable components, retiring accumulated technical debt and accelerating team-wide iteration and build times.
- **Raised production stability** through systematic crash triage, memory-leak elimination, and proactive Crashlytics monitoring across the app portfolio.
- Drive delivery with backend, UI/UX, QA, and product teams while ensuring compliance with Saudi government security policy and App Store review requirements.

Senior iOS Developer

Oct 2022 – Oct 2024

Ebtikar Technology Company (Dar Al-Ifta) | Riyadh, Saudi Arabia

- **Led end-to-end development of three production iOS applications** — Ask Me Fatwa, Ifta Employee, and Sheikh Fatwa — from architecture through production release and enterprise distribution.
- **Reduced the Ifta Employee crash rate by 95%** through systematic debugging, memory-management improvements, and continuous release monitoring.
- **Shipped 33 features across the three-app suite** while owning architecture in Clean Architecture and MVVM/VIPER, allowing each product to scale and be maintained independently.
- **Migrated asynchronous workflows to Swift Concurrency** (async/await), removing nested-callback complexity and improving responsiveness; integrated secure REST APIs, biometric authentication, and role-based access control.

Senior iOS Developer

Oct 2021 – Oct 2022

Saudi Electricity Company — Saudi Energy | Riyadh, Saudi Arabia

- **Delivered customer-facing features for ALKAHRABA**, a national utility app serving 11M+ users, spanning consumption tracking, bill payment, and service-request journeys.
- **Modernized legacy modules and integrated enterprise APIs** under strict uptime and security constraints, strengthening performance and stability on the highest-traffic screens.
- Built internal employee workflows for the Bowbti operations app, supporting field and back-office processes.

iOS Developer

May 2020 – Oct 2021

Alqemam qTech | Cairo, Egypt

- **Delivered modular Swift and UIKit applications** across e-commerce, on-demand services, and enterprise clients, integrating REST APIs, payment gateways, and third-party SDKs.
- Ran multiple concurrent client projects with product and design teams, consistently meeting release commitments.

Computer Science Instructor (Part-Time)

Mar 2021 – Mar 2022

Ivan Illich Institute | Dubai, UAE — Remote

- Taught programming, data structures, and software-engineering practice; mentored students through hands-on projects and career preparation.

iOS Instructor / iOS Developer

Jun 2018 – Mar 2019

IT Share Center / Alsalil Software House | Mansoura, Egypt

- Delivered Swift and UIKit training while contributing to production iOS development, debugging, and feature implementation.

TECHNICAL SKILLS

Languages: Swift (Expert) · Objective-C · Java

iOS & UI: SwiftUI · UIKit · iOS SDK · Auto Layout · Storyboards · Mac Catalyst · Push Notifications · Arabic Localization & RTL

Architecture: Clean Architecture · MVVM · VIPER · MVC · SOLID · Dependency Injection · Modularization

Concurrency & Performance: Swift Concurrency (async/await) · Combine · GCD · Threading · Memory Management · Performance Profiling

Networking & Data: REST APIs · URLSession · Alamofire · WebSockets · JSON · Core Data · UserDefaults · Keychain

Security & Compliance: Biometric Authentication (Face ID / Touch ID) · Role-Based Access Control · Keychain Storage · Secure API Integration · Government & Enterprise Standards

Testing & Quality: XCTest · Unit Testing · Debugging · Code Reviews · Firebase Crashlytics

Tooling & Delivery: Git · Fastlane · CI/CD · TestFlight · App Store Connect · SPM · CocoaPods · Agile/Scrum · Jira · ClickUp

SELECTED PROJECTS

- **Ifta Employee** — Government Enterprise · Secure HR, attendance, leave, tasks, notifications, and biometric authentication.
- **Ask Me Fatwa** — Government Public App · Inquiry submission, tracking, notifications, Clean Architecture, and secure APIs.
- **Sheikh Fatwa** — Government Restricted Access · Role-based inquiry management and secure sensitive-data workflows.
- **ALKAHRABA (Saudi Energy)** — National Utility, 11M+ users · Consumption tracking, bill payment, service requests, and performance optimization.
- **YelloDay** — E-Commerce · MVVM / Clean Architecture shopping platform covering product discovery, cart, payment processing, order management, and map-based delivery tracking.
- **Kyan Quality** — Enterprise Quality, 400+ branches · Secure inspection, quality-tracking, and compliance-monitoring workflows deployed across a large multi-branch operation.
- **Aljoud** — Education Platform · Virtual classrooms, lecture streaming, assessments, and rich-media student-instructor interaction backed by scalable services.
- **Carek** — On-Demand Services · Location-based booking, scheduling, live maps, real-time service status, and notification flows for a car-wash marketplace.
- **Bunny Box** — Gifting & E-Commerce · Product browsing, gift-box customization, ordering, and delivery tracking on an API-driven modular architecture.

EDUCATION

B.Sc. in Computer Science

Sep 2014 – Jun 2018

Faculty of Computers and Informatics, Suez Canal University | Ismailia, Egypt

- Graduated with cumulative grade Very Good. Graduation project: Team Space, a cross-platform team-management application for iOS and Android.

CERTIFICATIONS & TRAINING

- Diploma in Business Development — Professional Development Institute (Dec 2024 – Feb 2025)
- Native Mobile Application Development — ITI · Full Stack Web Development Nanodegree — ITI · Oracle SQL & PL/SQL

LANGUAGES

Arabic — Native · English — Professional Working Proficiency
